## Educational Objectives

**Aim:** Provide an overview of treatment planning for dental implants in Restorative Dentistry.

**Learning outcomes:**

By the end of the session delegates should be able to:

- Describe the principles of patient assessment and treatment planning for dental implants.
- Recall common protocols for planning implant cases.
- Discuss treatment planning considerations for hypodontia, trauma and oncology cases.
- Describe strategies for ridge augmentation in the management of mild, moderate and severe bone defects.
- Discuss the rationale for the use of short implants or sinus lifts in the posterior maxilla.
- Assess, diagnose and plan cases requiring rehabilitation with dental implants.

## Speaker's Details:

**Miss Hannah Beddis**, Consultant in Restorative Dentistry, Leeds Dental Institute.

**Mr Martin Chan**, Consultant in Restorative Dentistry, Clinical Lead for Dental Implants & Restorative Treatment of Developmental Anomalies, Leeds Dental Institute.

**Mr Lachlan Carter**, Consultant in Oral and Maxillofacial Surgery, Leeds Teaching Hospitals.

**Mr David Seymour**, Consultant in Restorative Dentistry, York Teaching Hospitals.
